

Prescription Safety Glasses

There are 5 key reasons why we feel you should be using our practice for your next purchase or prescription safety glasses:

- **Safety** - We can provide certified & compliant eyewear which is the safest option for your employees.
- **Convenience** - The most convenient with fast product delivery and servicing.
- **Product & Service** - Latest advances in safety eyewear coupled with a professional, full scope optometry service
- **Local** - Support a local business who employs local staff.
- **Pricing & Payment** - Our pricing is extremely competitive.

Safety

Safety eyewear is important. Approximately 116,000 Australians seek medical attention due to eye injuries per year at an average cost of over \$155 million. Most of these injuries are preventable and due to workers not wearing certified safety eyewear.

Preventing eye injuries results in less worker compensation claims and decrease in work time lost to injuries. In a normal week at work, we would removed at least 2 foreign bodies from the ocular surface of patients.

All our safety glasses conform to the Australian Safety Standards (AS/NZs1337.6 and AS/NZs1337.1). We use Polycarbonate and Trivex lens materials that are 10 times more impact resistant than standard plastic lenses. Not only are these lenses safer they also provide UV protection and block out 99.9% of the sun's harmful UV rays.

However, what makes using our practice the safest option for your employees is the proximity of our practice locations to your workplace. A visit to Eyecare Eyewear means your employees will spend less time out of work and less time behind the wheel compared to travelling to other major centres for their prescription eyewear.

Convenience

Eyecare Eyewear is located at the following addresses:

Dalby Practice: 87 Cunningham St Dalby Qld 4405 (4669 7072)

Chinchilla Practice: Shop 3 44 Middle St Chinchilla Qld 4413

For opening hours please see our website: www.ecew.com.au

We also focus on the provision of safety eyewear that will provide your employees with their safety glasses sooner than our competitors. We can provide orders for prescription safety glasses in less than 5 business days.

Patients will be notified once their spectacle job has arrived via their preferred method of communication. While we recommended that patients return to Eyecare Eyewear for spectacle adjustment and fitting, we can make arrangements for the spectacles to be sent directly to the employees. We can also provide on the spot servicing and repairs of eyewear which means no downtime with reduced employee productivity due to not wearing their prescription safety glasses.

Prescription Safety Glasses

Product & Service

Prescription Safety Eyewear

We have accounts with five laboratories that specialise in the manufacture of safety glasses and have over 100 models of endorsed safety eyewear from which to choose. This range ensures that we are better equipped than our competitors to find a style that best suits your employees.

We can provide the following lens designs and features with our safety glasses:

- 1) Progressive, bifocal and single vision lenses
- 2) Lens treatments including, antireflection multicoatings and scratch resistant coatings.
- 3) Photo chromatic lens materials (change from clear to tinted with UV exposure)
- 4) Clear or tinted lens options.

We are also the exclusive distributors of Mallee Bull and Scope Safety Glasses. Scope Safety Glasses who have revolutionised the safety eyewear market with their outer safety shield and inner prescription lens adaptor. This product removes the need for specific safety endorsement of frame and lens combinations saving time and money without compromise on performance or safety.

Eyecare Eyewear will honour the full manufacturer's warranties on all product dispensed and provide complementary adjustments and maintenance services on all eyewear. This is valid for the duration of the one year certification period.

Optometry Services

At Eyecare Eyewear, our optometrist is responsible for the dispensing of safety eyewear in addition to providing a full scope optometry service including:

- Comprehensive eye examinations
- Front and back of eye photos and scans (on indication or request)
- Eye trauma treatment including: foreign body removal, chemical burns or welding flash.
- Ipad dispensing tool to optimize prescription lens design and lens position in frame
- Prescriptions for therapeutic eye medications

It is recommended that all patients have an eye examination prior to the prescribing and fitting of prescription safety glasses. In addition to refractive results, a comprehensive examination includes an assessment of the ocular health. This assessment frequently influences the parameters of a prescription and the recommendations for additional lens treatments and features. If a patient holds a valid prescription Eyecare Eyewear can use this result to generate spectacles. While most prescriptions are valid for two years, it is strongly recommended that patients are re-examined if the prescription is more than one year old.

Local

We only employ team members who demonstrate a commitment to our local community. Like Eyecare Eyewear, our preferred prescription lens manufacturer (CR Surfacing Laboratories) is also an Australian owned and operated company.

Prescription Safety Glasses

Pricing & Payment

Prescription Safety Eyewear

For traditional prescription safety eyewear, Eyecare Eyewear will continue use the recommended retail prices as proposed by our suppliers. However, using the innovative CR Surfacing Scope Safety Glasses has now enabled to provide safety eyewear at retail prices far less than our previous offerings.

We aim to ensure that we price our prescription safety glasses competitively. Due to the numerous frame and lens combinations please we let us know if you would like an exact quotation for particular product.

Optometry Services

Eyecare Eyewear is a private billing practice and our consultation pricing reflects the thoroughness and experience of our optometrists. More information on our consultation fees can be found on our Consultation Pricing Schedule.

We also have EFTPOS facility allows for both health fund and direct Medicare claiming and reimbursement.

Payment Terms

We politely request full payment for optometry consultations on the day of service.

For all prescription safety eyewear we request a forty percent deposit on the day of dispensing with payment in full on delivery.

We have the facilities to establish accounts for larger employers with monthly invoice generation and 30 day payment terms.
