

Aviation Eye Examination

An Aviation Eye Examination is a specialized and comprehensive assessment of your vision and eye health, specifically tailored to meet the stringent requirements of aviation safety authorities.

Unlike a standard eye test, it delves deeper into specific visual functions critical for pilots, air traffic controllers, and other aviation personnel.

Why is a CASA Eye Exam Important?

The Civil Aviation Safety Authority (CASA) sets Australia's vision standards for aviation. A CASA Eye Exam, performed by a certified optometrist, is mandatory for your aviation medical certificate. It's crucial for:

- **Safety First:** Ensuring precise vision for reading instruments, spotting other aircraft, and navigating safely.
- **Regulatory Compliance:** Meeting legal requirements to maintain your pilot or ATC certificate.
- **Early Detection:** Catching subtle eye issues that could impact aviation safety.

What to Expect During Your Exam?

Our Dalby optometrists conduct a non-invasive, thorough exam. We'll check your:

- **Vision:** Distance and near.
- **Color Vision:** Crucial for instruments and navigation lights.
- **Visual Field:** Your peripheral vision.
- **Depth Perception:** Your ability to judge distances.
- **Eye Health:** A comprehensive check for any underlying conditions.

Bring any current glasses/contacts and relevant medical history.

Who Needs a CASA Eye Exam?

Many aviation roles require these exams, including:

- Commercial & Private Pilots
- Air Traffic Controllers
- Student Pilots
- Certain Drone Operators
