

## Pre & Post Operative Assessments

At Eyecare Eyewear Optometry, we understand that undergoing eye surgery can be a significant step towards better vision. We are committed to providing you with exceptional care, not just after your surgery, but before it too.

Our comprehensive pre and post-operative optometric assessments are designed to ensure you are fully prepared for your procedure and recover smoothly, leading to the best possible outcomes.

### Pre-Operative Assessment: Setting You Up for Success

Before surgery, our detailed assessments are vital. We perform eye health evaluations, precise refractive measurements, corneal mapping, and intraocular pressure checks. These steps ensure accurate surgical planning and help us discuss what to expect.

### The Crucial Role of Dry Eye Management

Did you know that managing dry eye before surgery significantly improves your results? A healthy tear film ensures accurate measurements for lens implants, reduces post-operative discomfort, promotes faster healing, and enhances overall visual quality. We offer comprehensive dry eye diagnosis and personalized treatment plans to optimize your ocular surface.

### Post-Operative Care: Your Smooth Recovery

Our commitment continues after your surgery with regular follow-up appointments to monitor healing, manage medications, and ensure optimal vision.
