

Scleral Contact Lens Fitting

Unlike conventional contact lenses that rest directly on the sensitive cornea (the clear front surface of your eye), scleral lenses are larger.

They vault entirely over the cornea and rest gently on the sclera - the less sensitive white part of your eye.

This unique design creates a tiny, fluid-filled space between the lens and your cornea.

Who Benefits?

Scleral lenses provide superior vision quality and comfort for many, especially those with:

- Keratoconus and other corneal irregularities
- Severe dry eye syndrome
- Post-surgical corneas
- High astigmatism or complex prescriptions

Our Specialized Fitting Process

Fitting scleral lenses is precise and customized. We conduct a comprehensive eye exam, take advanced 3D measurements of your eye, and perform trial fittings to ensure perfect comfort and vision. We'll also provide thorough training on lens care.

Ready for a Change?

If you're seeking better vision and comfort, scleral lenses could be life-changing. Our experienced team is here to assess if they're right for you.
